FUJITSU

## FH\*\*ELV

EcoNet® Enabled Modulating Air Handler

---

The Fujitsu FF\*\*ELV EcoNet® Enabled Modulating Air Handler is designed to be energy efficient and quiet - providing you with a higher level of comfort.

### REDUCE ENERGY BILLS

---

The high-efficiency, constant CFM, variable-speed blower motor modulates the airflow based on cooling demand for enhanced SEER performance.

### QUIET AND EFFICIENT

---

The sturdy design of our air handler provides excellent thermal and sound insulation.

### ECONET

---

This technology sends you important alerts and reminders to keep your system working at its best. Plus it's easy to adjust your comfort from home or away.<sup>1</sup>

## ENJOY THE BENEFITS OF A HIGHER LEVEL OF COMFORT

The Fujitsu FH\*\*ELV Air Handler features a high efficiency, constant CFM, variable speed motor with modulating airflow. When the unit is matched with a two-stage or variable-speed air conditioner it is able to run at a lower speed – this provides even temperatures and reduces energy usage.

### HUMIDITY CONTROL

A new Fujitsu Handler will help manage humidity levels in the home, improving your comfort and helping you save money on energy bills.

### EFFICIENT HEATING & COOLING

Fujitsu Air Handlers feature a flexible design that allows them to meet the needs of a variety of systems. Your contractor will recommend a unit that will best meet your home's airflow needs. The **1** factory-installed indoor aluminum cooling coil is the key component for your air handler. The coil is essential to humidity control and improved system performance, and the high-quality standards used in manufacturing result in fewer maintenance calls.

### QUIET OPERATION

The Fujitsu FH\*\*ELV Air Handler is designed with a **2** sturdy steel cabinet with **3** one inch of foil-faced insulation, offering excellent thermal and sound insulation.

### VERSATILE DESIGN

The 4-way convertible design of Fujitsu Air Handlers allows the unit to fit in with the design of your home.

### OPTIONAL ELECTRIC HEAT

When a heat pump is paired with the unit, Fujitsu Air Handlers can also provide efficient heating for your home. An optional electric heater kit can be added to keep you cozy all winter long.

### QUALITY DESIGN

The FH\*\*ELV Air Handler features a new lanced fin design for maximum performance and increased efficiency. A new high-grade condensate drain pan keeps the unit operating smoothly, especially when the weather heats up. And the corrosion-resistant aluminum endplates keep your unit looking as good as it runs.

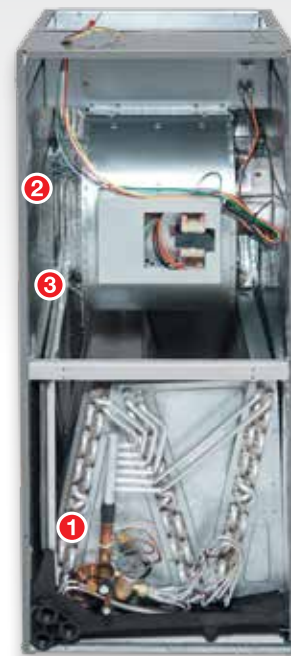

### LIMITED WARRANTY INFORMATION<sup>2</sup>:

Conditional Parts - 10 Years (Registration Required)

<sup>1</sup>Purchase and installation of EcoNet® WiFi Kit and EcoNet Control Center required; WiFi broadband Internet connection required; must be paired with EcoNet Enabled heat pump or air conditioner.

<sup>2</sup>For complete details of the limited warranties, including applicable terms and conditions, contact your local contractor or go to [www.fujitsugeneral.com](http://www.fujitsugeneral.com) for a copy of the product warranty certificate.

### BENEFITS AT-A-GLANCE

#### MOTOR:

Constant torque (ECM) Single-stage airflow

#### EVAPORATOR COIL:

All Aluminum

#### WARRANTY<sup>1</sup>:

Conditional parts – 10 years
